## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

- 5) ☐ Notice of Informal Patent Application (PTO-152)
- 6) ☐ Other:

This application contains claims directed to the following THREE<sup>1</sup> patentably distinct species of the claimed invention:

A. Addition of oxidizing agent to the chemical treatment unit from outside the vessel, to which claims 3 – 4 are believed to be directed; and

B. In situ generation of the oxidizing agent within the reaction medium, wherein there are two sub-species:

B.1. Agent produced via electrolysis, to which claims 5-6 are believed to be directed; and

B.2. Agent produced via cavitation, to which claim 13 is believed to be directed.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1, 2, 7-12, 14-15 are generic to all species. No claim is generic to both species B1 and B2 without also being generic to species A.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

---

<sup>1</sup> A outside addition, B1 electrolytic *in situ* agent production, and B2cavitation-induced *in situ* agent production.

Art Unit: 1724

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

In an interview with William Smith on or about 12/14/01, applicant was invited to elect a species over the telephone was extended, but such invitation was respectfully declined.
